Web developer with +4 years of experience developing web applications using (Angular 8 - 15 .Net, and Node.js). I have worked in the private and public sectors on human resources projects, accounting projects, private and public transportation, and health. I feel my greatest contribution to a project is the ability to communicate with other team members in order to improve the web page functionalities, as well as identify performance improvements on the projects. I am driven by innovation, being able to teach my knowledge, learn new things, and take on new challenges.

EXPERIENCE

Emissary, **Full-Stack Developer (**Direct customer**) —** *NOV, 2022 – Present*
- I led a team for the migration from scratch of a website from Angular 8 to 15.
- I create a shipping order module from scratch, improving the user experience by 30% and reducing waiting times by more than 100%.
- Improvements in requests through good programming practices.
- Creation and improvement of a login, through email confirmation and good code practices
- Stack: Angular, Redux, .Net, Node, Nest, SQL Server, Azure,HTML5 and CSS3.

ConsWare, **Full-Stack Developer (**Outsourcing company**) —** *OCT, 2021 – NOV 2022*
- I led a team where we designed a vehicle policy program, improving the user experience by 25%.
- We designed a credit program for vehicles, improving the user experience by 45% by applying good coding practices.
- Contributed with the BackEnd team to improve the JSON responses and save the time of its implementation in Frontend by 50% by applying good coding practices and improving the structure.
- I designed a dynamic information mail-sending control. Tech

Stack: Angular, Redux, .Net, Node, Nest, SQL Server, Azure, HTML5 and CSS3.

DigitalWare (Direct customer**) CHATBOT**
— JUN, 2021 – OCT, 2021
- I led a team where we developed and implemented, free of charge, a chatbot that saves 100% on the cost of the Azure chatbot service.
- We designed a website to generate questions and their respective answer for the chatbot, improving user search time by 60%.
- Free implementations of the chatbot in a productive environment, reducing the external expenses, of the company.

Tech Stack: Angular, .Net, Express, SQL Server, HTML5, and CSS3.

Occupational health *— APR, 2021 - JUN, 2021*
- We designed a patient entry module.
- I designed a satisfaction survey program.
- Promote the best organization of the project by 25% through the use of Scrum, which allowed us to better define the objectives.

Tech Stack: Angular, Java, .Net, HTML5, and CSS3.

SAQ, **Web Developer (**Outsourcing company**) —** *OCT, 2020 – APR, 2021*
- Improved webpage access by 25%.
- Reduced the number of bugs reported in a website by the client by 50% with good communication with the customer.
- Collaboration with the Backend team for the creation of new APIs.

Tech Stack: Angular, PHP, PostgreSQL, JavaScript, Jquery - ajax, SQL Server, HTML5, and CSS3.

CompExpress, **Junior Developer (**Direct customer**) —** *JUN, 2018 – APR, 2020*
- planned, coordinated, and executed preventive and corrective maintenance.
- We designed software that was developed to control product sales.
- Submit maintenance reports.
- Test custom system.
- 3D modeling.

Tech Stack: PHP, Angular, Java, MySql, TypeScript, Node, Apache, jboss, JavaScript, HTML, and CSS

SKILLS

Programming Languages: <u>Advanced</u>: JavaScript, TypeScript, C#; <u>Intermediate:</u> Java, C**;** <u>Basic:</u> Python, Dark.
Frameworks Tools: <u>Advanced:</u> Angular, .Net; <u>Intermediate:</u> Express, Jquery, SQL Server management studio**;** <u>Basic:</u> Android studio, Flutter.

Data Base: <u>Advanced:</u> SQL Server, PostgreSQL; <u>Intermediate:</u> MySQL**;** <u>Basic:</u> MongoDB.
Tools: Git, Slack, Azure, Azure Devops.
Agile: SCRUM
Languages: <u>Intermediate</u>: English; <u>Native:</u> Spanish.

EDUCATION

University Name – *Barranquilla, Colombia. Electronic Engineer, Sep 2018*
